

MT Tumbler 200 Pro

The MT Tumbler 200 Pro is designed for **quick and simple maintenance and assembly** without the need for tools. Its system allows it to be assembled and disassembled in 1 minute.

The trimmer has a compact design that can process up to **14 kg/h of fresh production**. It is a reliable option for those seeking to achieve **high production with minimal space and maintenance requirements**.

Compact design

- **A 5-blade reel can perform 12,000 cuts in 60 seconds.**
- Performs the work equivalent of up to **10 staff.**
- **A carbon steel flexible blade** for high precision cutting.
- **Model with barrel and blade reel rotation speed regulators** that enables it to be adapted to the conditions and state of the raw material.
- **200 W 5-blade reel motor.**
- **20 W barrel motor.**
- Enables working on **fresh and/or dry raw material.**
- Leaf collecting bag made of **140 micron nylon for pollen collection.**
- Easy to transport.

Easy to maintain

- **Can be fully disassembled without needing any tools.**
- You will only need **1 minute to disassemble it.**
- **Can be totally cleaned with hot pressurised water** and disinfected afterwards with our **Master Clean** isopropyl alcohol.
- **The barrel** should be washed simply by sprinkling its surface with hot water and applying Master Clean for subsequent disinfection.
- **The electrical assembly must not come into contact with water** under any circumstances. It should only be maintained using Master Clean.

304 STAINLESS STEEL BARREL

FLEXIBLE CARBON STEEL CUTTING BLADE AND A 5-BLADE REEL

140 MICRON NYLON MESH BAG

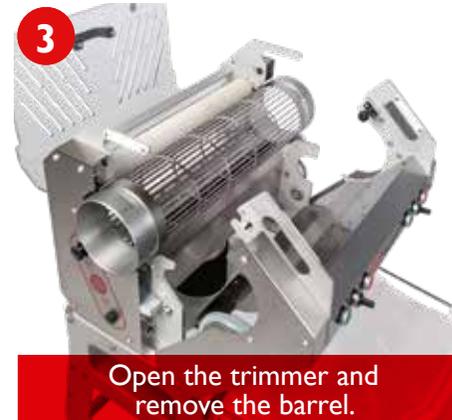

Disassembly in 1 minute

Remove the hopper.

Open the cover.

Open the trimmer and remove the barrel.

Remove the cover and the electrical assembly.

Take out the blade.

Separate the trimmer from the aspirator.

Remove the collection bag.

The MT Tumbler 200 is now fully disassembled!

Wet or dry?

The Master Tumbler technology makes the decision easy. **The barrel can be changed in seconds without the need for tools** whenever you want to trim wet or dry raw material.

Both barrels are made of 304 stainless steel.

MASTER TRIMMERS

The purchase of the MT Tumbler 200 includes the barrel for fresh trimming. If you want to dry trim or to add this barrel to your order to obtain both barrels, please specify this at the time of purchase.

Technical data

Electrical connection	220/230 V 50/60 Hz
Weight trimmer	33 kg
Weight leaf collector	26 kg
Machine size	76 x 70 x 93 cm
Size of pallet	71 x 56 x 106 cm
Fresh production rate	12-24 kg/h
Dry production rate	3 kg/h
Noise	85 dB
Barrel	304 stainless steel
Cutting blade	carbon steel
5-blade reel	tempered steel
Machine	304 stainless steel
Leaf collection bag	140 micron nylon mesh
Aspirator	Aluminium
Extractable electrical assembly	Yes
Air cooled motor	Yes
Security system	Yes
Air suction	Yes
Warranty	5 years

MT Tumbler 200 Pro

Full System

The design of our Tumbler trimmers allows us to join them in tandem. By adding entry and exit conveyor belts and the MT Tumbler 200 rail, you will obtain a full production system, designed for large scale producers and those with intentions to grow.

Benefits:

- The rails provide the slope required to link MT Tumbler 200 machines in series to increase the production volumes.
- Adding an entry belt results in a 30% production increase.
- Adding the exit belt facilitates exhaustive quality control.

TRIM WET

Production

1. 12-14kg/h
2. 24-28kg/h
3. 36-40kg/h

Equivalent

- 10 operators
- 20 operators
- 30 operators

TRIM DRY

Production

1. 3 kg/h
2. 7 kg/h
3. 15 kg/h

Equivalent

- 4 operators
- 10 operators
- 22 operators

GMP Compliant

The trimmer is **manufactured in stainless steel for use in cGMP compliant facilities**. All components, including the carbon steel cutting blade, in contact with the product are certified for food use.

The design of the MT Tumbler 200 Pro is clean, with no corners where residues can accumulate. Because it can be fully disassembled, the Tumbler can be totally cleaned and disinfected after use. This prevents any possible contamination of the material to be processed so complying with the strictest GMP requirements.
