

Q60

Ideal for
beginners

The HOMEbox® Ambient Q60 is ideal for growers who want to manage their own personal requirements of home grown herbs and other compact plants. Amazingly it takes up about the same space as a small bookcase yet can accommodate between one and five plants! It is ideally lit with a compact fluorescent grow light—every photon being maximised towards full potential thanks to the PAR+ super reflective lining, exclusive to HOMEbox®. Despite its compact size, the HOMEbox® Ambient Q60 is still astoundingly productive, especially when combined with a hobby hydroponic growing system. The double 700-micron MicroMesh bug-screened, OmniFlow directable air vents provide easy air exchange and promote a healthy growing environment. A generous roof vent can accommodate extraction fans up to 160 mm (6.3").

Assembled size: 60 x 60 x 120 cm

Grow space: 0.36 m²

- High-tech German design and engineering
- The basis for successful and safe growing
- Rugged, plant-safe materials ensures long working life
- Removable, water-resistant flooring
- Solid base attached to the tent with a zip all the way around
- Inlet and outlet tubes:
 - + 100 mm (4"): 1x Back
 - + 125mm (5"): 1x left
 - + 160 mm (6.3"): 1x Roof
- 2 x 125 (5") OmniFlow-Airvents left and right side
- 700-micron MicroMesh bug-screen
- Tough canvas outer shell
- PAR+ super reflective lining promotes faster growth and higher yields
- Metal structure (16 mm), strong precision plastic corners
- Once closed, unit is entirely sealed and virtually light proof
- Total-Blackout Zippers - no need for Velcro flaps
- Maximum Capacity: 50 kg
