

earth MAX

grow schedule

Use VitaLink Enriched Soil for best results

Please note: the final solution PH should be between 6-7.5.
For longer growth cycles, repeat Growth Week -2. For longer flowering cycles, repeat Bloom Week 4.

VITALINK

This is a straightforward grow schedule designed for new/intermediate growers, not all of our products are included in the chart. Advanced grow schedules are available which cover the rest of our range, please visit our website for more information on those!
