

# Vista Triangle+

It's all about the height!

Our indoor greenhouse for corners is now also available in a 200 cm-high version – the HOMEbox® Vista Triangle+. The triangular base not only lets you make optimum use of every corner of the room for an indoor grow house, but also provides your plants with more room for growth.

This triangular indoor greenhouse also has a large window in the front section that gives you a large view inside the tent, without compromising the inside climate. An LED / 250-W bulb provides the ideal illumination.

**Assembled size:** 120 x 75 x 200 cm

**Grow space:** 0.4 m<sup>2</sup>

- High-tech design and technology from Germany
- Step-free, barrier-free access possible
