

Medium

For variations!

The HOMEbox® Vista Medium offers great features that users of our tried and tested Clonebox View have long learned to appreciate. However, it also has fantastic new features that make propagating plants even easier.

The viewing windows on the front and sides let you give your valuable plants the attention they deserve. They can of course be sealed to create a usable area that is completely impermeable to light if required. The optimal reflective PAR+ inner lining helps produce ideal lighting conditions and simultaneously reduces the risk of excessive heat building up in the sensitive atmosphere.

The Vista Medium is equipped with an adjustable shelving system. So you can freely choose whether to load the useable area with up to 12 large propagators or let the plants have the luxury of more free room to grow. In addition, there are four individual shelf inserts available that can be used variably. It is thus possible to create a spacious grow tent on one side of the tent and use the other area for smaller plants – unbeatable flexibility!

Assembled size: 125 x 65 x 120 cm

Grow space: 2.4 m²

- Two large, transparent, sealable viewing windows on the side (41 cm x 54 cm)
- a large viewing window on the front (85 cm x 85 cm)
