

Q120

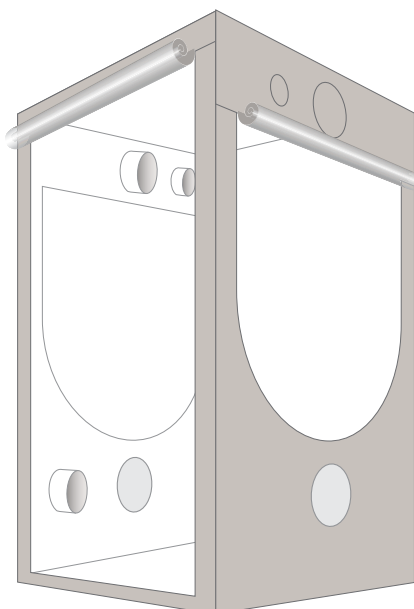

Astoundingly
productive!

Nothing performs like a 600-watt HID grow light housed in a HOMEbox® Ambient Q120! It's all thanks to the PAR+ super reflective inner lining. Plants develop faster and produce more flowers and fruit because more plant-usable light is directed at the canopy. Crop quality is also remarkable due to less heat build-up (the #1 cause of low crop quality.) The result is an incredibly efficient growing chamber that still only takes up 1.44 m² of floor space!

The HOMEbox® Ambient Q120 is a clear favourite among dedicated indoor growers and can be used for all stages of the plant lifecycle, however the most popular application is a flowering chamber using a high pressure sodium lamp—amazingly, up to 36 small plants can fit inside this super-productive grow box!

Assembled size: 120 x 120 x 200 cm

Grow space: 1.44 m²

- High-tech German design and engineering
- Rugged, plant-safe materials ensures long working life
- Removable, water-resistant flooring
- Solid base attached to the tent with a zip all the way around
- Double side access
- Inlet and outlet tubes:
 - + 100 mm (4"): 1x right, 1x left, 1x Back
 - + 160 mm (6.3"): 1x left, 1x Back
 - + 200 mm (8"): 1x right, 1x left
 - + 250 mm (10"): 1x Roof
- 2 x 250mm (10") OmniFlow-Airvents left and right side
- 700-micron MicroMesh bug-screen
- Tough canvas outer shell
- PAR+ super reflective lining promotes faster growth and higher yields
- Super strong 22mm diameter tent poles—stronger plastic corners
- Once closed, unit is entirely sealed and virtually light proof
- Total-Blackout Zippers - no need for Velcro flaps
- Maximum Capacity: 75 kg
